Thanks for getting back. First the important stuff. Hannah Kate was born on November 20th, a planned C-section. 7 pounds. The first day she developed a breathing problem - so the first 24 hours were dicey. She stabilized by the second day. 7 weeks later she's doing quite well, she's over 10 pounds & delightful. (We still could use more sleep ;-)...

Talked to Mike at home. Good discussion.
Sierra does not do early stage - they want to find companies w/$1M in revenues. Had some good advice in our short call. He will point me at investors that do early stage.

(We still could use more sleep ;-)...
With regards to Garage, we are working w/Don Sanders (a reference to a reference...) - he has a relationship with Bill Reichert. My thinking is to contact Mike once we have a bit more traction with Garage (and Don).
Your offer to incorporate for $1K is generous and I appreciate it. Money is tight - on the personal front, having number 2 has pushed things a little harder. On the business front, other expenses are coming up, e.g., we've only filed provisional patents, so w

Sam,

I sent the ZIP using regular email.

The ESP (RITEPAGE Email Sync Processor) has been moved from ritepage.com to ritepage.net so you can now start sending RITEPAGE messages to whomever, when you're ready.

- Michael

p.s. Please let me know when you've got the updated application installed.
Thanks.

The link you provided was not active so I copied it, brought up IE, and pasted the link in the address space. I received the same error condition.

Let's keep with the $5,100,000 number that you and I talked about; it seems to be consistent with the expectations we set with Frugal. If the new pricing model is different, I don't want to jeopardize the deal. Whatever you do, don't use the new model unless you consult with me first!

Alex, there is an updated pricing model out on the MyAutomated Yahoo! Sales Portal. I just put it out there yesterday. The model scales to opportunities over 1000 seats.

Charley - in this latest release we have built quite a bit of infrastructure to support mobile devices. To understand what you need we would need to see a more rigorous spec.

Supporting this deal might jeopardize the V7 release. Working thru the issue w/Product Management. Look at the associated discussion for details.
Meeting w/team to make reccomendations - may need higher level support to contact HAL, determine if we can juggle timelines to keep v7 on track.
Please contact me before approaching HAL.
